WHAT IS HOMEOPATHY?

Homeopathy is a **safe, gentle, and natural** system of healing that works with your body to relieve symptoms, restore itself, and improve your overall health.

It is **extremely safe** to use, even with very small children and pets, has none of the side effects of many traditional medications, is very **affordable**, is made from natural substances, and is FDA regulated.

Homeopathy has been clinically shown to be effective in over 200 years of use in both acute and chronic conditions.

One thing to note is that the word homeopathy is not a general or "umbrella" term that describes a variety of different natural therapies. Although homeopathic remedies are derived from natural substances, homeopathy should not be confused with herbal medicine, Chinese medicine, or other types of natural medicines. It is its own, unique therapeutic system.
